ABOUT ME

Web developer skilled in **Python, Flask, C++, Java**, and frontend tools like **HTML, CSS, and JavaScript**. I enjoy building full-stack applications with clean code and responsive design. With a strong problem-solving mindset and beginner-level experience in **Machine Learning (scikit-learn, TensorFlow basics)**, I aim to contribute to real-world projects and grow as a developer.

"Aspiring **full-stack** and **AI/ML developer** seeking opportunities to apply problem-solving skills and build real-world projects while learning advanced technologies."

EDUCATION

2023 - 2027

Uttarakhand Technical
University

Bachelor of Technology in Computer Science (AI & ML)

B.Tech in Computer Science with a specialization in AI & ML, focused on developing intelligent systems and gaining hands-on experience with machine learning, data science, and software development.

EXPERIENCE

Jul 2025 – Aug 2025

AICTE – Shell India –
Edunet Foundation |
Virtual

AI & Data Analytics Intern

- Completed a 4-week internship focused on Artificial Intelligence and Data Analytics under the Skills4Future program.
- Gained exposure to machine learning basics, data handling, and analytics tools.

Jun 2024 – Jul 2024

SLOG Solutions Pvt.
Ltd. | Onsite

Artificial Intelligence Trainee

- Completed a 4-week training program on Artificial Intelligence.
- Learned the fundamentals of AI, machine learning concepts, and implementation basics.

SKILLS

- Leadership
- Artificial Intelligence
- Communication
- Web Development
- Machine Learning
- Git/GitHub
- Problem Solving
- Jupyter's Notebook

PROJECTS

1. To-Do Web Application (Flask, Python, HTML, CSS, SQLite)

Built a full-stack to-do list web app using Flask and SQLite for task management. Implemented CRUD (Create, Read, Update, Delete) functionalities with a clean, responsive UI.

2. EV Adoption Forecast Tool (Machine Learning, Python, scikit-learn, Pandas)

Developed a machine learning model to predict the increase of EV charging stations in Washington County. Used data preprocessing, feature engineering, and regression models for forecasting.

3. AI Training Mini-Projects (Python, scikit-learn, TensorFlow basics)

Implemented beginner-level ML models such as Iris Classification and Spam Detection. Practiced supervised learning workflows including data cleaning, training, and evaluation.
